RON GOLD, Commissioner

ATTENTION

Canal Mutual Water System Users

November 2012

ARCHAEOLOGICAL TESTING

As part of the Canal Mutual Water System Improvement Project crews from Pacific Northwest Archaeological Services will be digging test holes along the project route within the Starr White development and along US Highway 101. The archaeological survey is required by the Department of Archaeology and Historic Preservation as part of the grant funding. The survey is scheduled for November 16.

Underground utility locates will be called in an attempt to avoid underground utilities. Due to the number of holes to be dug, there is potential for hitting underground utilities that were not properly located. If you lose any of your utilities (cable television, telephone, power, water, etc.) during the day of the survey, please contact the corresponding utility. If you have any questions regarding this survey, please call Director of Operations-Water at (360) 877-5249.

Please share this notice with all the other people, especially those who may not have received this notice directly (for example, people in apartments and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

Thank you for your patience,

Water Operations
