

LARGE TREES AREA
Plant large trees (over 35 feet high when mature) at least 50 feet away from overhead power lines.

KEEP CLEAR
Do not to fly objects near power lines.

PRUNING AREA
To help prevent outages, trees and shrubs will be pruned if they are within 10 feet of overhead power lines.

MEDIUM TREES AREA
Plant medium trees (25 - 35 feet high when mature) at least 25 feet away from overhead power lines.

CLEARANCE AREA
Trees and shrubs should be planted at least 10 feet away from ground-mounted transformers.

KEEP CLEAR
Keep the area around the meter clear for reading and safety.

LOW TREES AREA
Plant low growing trees (15 feet high max. when mature) and shrubs at least 10-25 feet from overhead power lines.
