

ENERGY SERVICES REBATE PROGRAMS

April 1, 2023

RESIDENTIAL PROGRAMS

EXISTING CONSTRUCTION

Ductless Mini-split Heat Pump System

A heat pump is a compressor-driven electric heating and cooling system that distributes conditioned air through a centralized duct system or ductless air handler. A heat pump is at least twice as efficient as an electric resistance forced-air furnace. PUD 1 offers measures for ductless and ducted mini-split heat pumps that are conversions from an electric forced-air furnace or upgrades from zonal electric heating.

Single Family Site Built and Manufactured Homes

\$800

- Must have pre-existing baseboard, electric wall heat or electric forced air furnace
- The Heating Seasonal Performance Factor (HSPF) requirement is 9.0 HSPF or 7.6 HSPF2
- Must be pre-approved
- One rebate only per existing residence

Ductless Mini-split Heat Pump System Upgrade

\$100

- Must have Ductless Heat Pump System already installed

Air Source Heat Pump

Air-Source Heat Pump (ASHP) is a compressor-driven electric heating and cooling system that distributes conditioned air through a centralized duct system. An ASHP is at least twice as efficient as an electric resistance forced-air furnace. Mason PUD 1 offers measures that are conversions from an electric forced-air furnace.

Air Source Heat Pump

\$1400 - \$1600

- Air source heat pump conversion program - site built or manufactured home must have an electric forced air furnace
- The Heating Season Performance Factor (HSPF) rating must be 9.0 HSPF or 7.6 HSPF2 and a Seasonal Energy Efficiency Ratio (SEER) rating of 14 SEER or 13.4 SEER2. It must be AHRI tested and certified
- Work must be performed by a PTCS certified technician and meet PTCS requirements
- Duct Sealing is required when 30% or more of duct work is in unconditioned space and accessible
- Mason/Jefferson County Mechanical permits are required for site-built homes
- Washington State Labor & Industries (L&I) electrical permits are required for site-built and manufactured homes

Northwest Energy Efficient Manufactured Home (NEEM) 1.1 or 2.0

\$1200 - \$1400

- Must have Ductless Heat Pump System already installed

RESIDENTIAL PROGRAMS

Appliances

About 80% of American homes have a clothes washer and dryer. The Federal standard serves as the baseline for these laundry appliances. ENERGY STAR rated laundry appliances use at least 20% less energy than the Federal standard. Clothes washers have additional characteristics for savings based on the associated water heater fuel type (for their use of heated water) and dryer fuel type (for the electric savings on drying time).

• Energy Star Front Load Washer	\$35
• Energy Star Top Load Washer with an IMEF of 2.76+ - Household must have electric water heater to qualify	\$30
• Energy Star Electric Clothes Dryer	\$50
• Heat Pump Water Heater	\$600
• Unitary, 40 Gallon Tank, All Tiers Unitary, 50 gallon and above:	
• Tier 1	\$300
• Tier 2 & Tier 3	\$600
• Tier 4	\$700
Split-system	\$800

COMMERCIAL PROGRAMS

Commercial - Ductless Mini Split Heat Pump System **\$1000 per ton**

- Must have pre-existing electric resistance heat
- Must be pre-approved, please call for requirements

Ductless Mini-split Heat Pump System Upgrade **\$300 per ton**

- Must have Ductless Heat Pump System already installed

Commercial Lighting

Site-specific calculators are used to determine energy savings when there is too much variability in the range of savings associated with a given technology and/or application. In the case of nonresidential lighting, the unique hours of operation by space use type and the wide variety of building types and applications require the use of a site-specific lighting calculator instead of a suite of lighting UES measures.

- New and existing
- Please call for requirement

For more information regarding the rebate program,
call Mason County PUD No. 1 at (360) 877-5249 or toll free at (800) 544-4223 or email Trisha Martin
at trisham@mason-pud1.org

Please allow 30 days for processing once the rebate forms are turned in for approval.
